

IAN NGANGA KAMAU

Nairobi Kenya | +254 725153900 | iankamnganga@gmail.com | github.com/NGASH7

Professional Summary

I'm a curious and driven Software Engineer with hands-on experience in frontend development, web applications, and system design. Recently completed industrial attachment at the Kenya National Innovation Agency, contributing to real-world platforms including STRI4Society using the Laravel framework, and an HR management system. Passionate about building robust, scalable, and user-friendly applications, I have developed hands-on projects that deliver real-world solutions. I thrive in collaborative environments, enjoy tackling complex technical challenges, and love simplifying concepts for seamless user experiences. Always eager to learn and grow, with a growing interest in chatbot systems, automation workflows, and AI-assisted development. I'm excited to contribute my skills to creating impactful, innovative software solutions.

Professional Skills

Programming & Data Structures

- General understanding of Java, C, PYTHON programming languages
- Strong foundation in data structures, algorithms, and problem-solving techniques.

Database Design and Implementation

- Skilled in databases design, queries, functions and stored procedures.
- Experience in MySQL and PostgreSQL.

Web Design

- Proficient in HTML5, CSS3 and Javascript for responsive and user-friendly layouts.

Web Development

- Well versed with PHP with the Laravel framework and Python with the Django framework for backend development.

Linux Skills

- Well versed with knowledge in Debian based Linux systems, Kali Linux and Ubuntu Linux systems
- Proficient knowledge in working with the Linux command line interface (terminal).

ADDITIONAL SKILLS

- Effective communication and teamwork abilities.
- Strong research and problem-solving skills.

Work Experience

Software Developer (Industrial Attachment)

Kenya National Innovation Agency (KeNIA)

Jan 2026– April 2026

- Developed and maintained frontend interfaces for the STRI4Society platform using the Laravel framework, improving usability and user experience
- Collaborated with the team during development and deployment of web solutions
- Designed and developed a web-based HR system enabling job applications and employee management
- Improved recruitment workflow through digital automation and streamlined employee data management

Projects

Personal Portfolio

Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase my profile, skills, and projects professionally, featuring a smooth user interface and animations, which enhanced my visibility to recruiters and provided a centralized platform to present my work and GitHub projects.
